THE CORRESPONDENTS.

"*The Ordinary Architect.*"—It is to be hoped that "ignorance and pure ass" will not suffer themselves to be imposed on by such trickery.

"*Widow in Books.*"—Can any of your correspondents suggest a preventative of mildew in books? In a valuable public library in this town (Liverpool) several books are seriously injured by mildew, the operations of which appear most capricious; in some cases attacking the printed part of an engraving, leaving the margin unaffected; in others attacking the inside of the books only; and in a few instances attacking all parts with the utmost impartiality.—B.

"A. B.," "Whitby," "Modellus" (there are several good architectural modellers, who have not more work than they can do), "F. S.," "W. N.," "R. N." (returned with thanks), "E. H.," "G. J. R.," "J. P.," "Queerdom," "A Subscriber," "W. T.," "B and P.," "M. A.," "A Lady," "W. E.," "Xylopolist," "W. M.," "Alpha" (general drawing schools are advertised in our columns), "A Lover of Justice," "*Nil Desperandum*," "S. W. S." (write to Amsterdam).

"*Books and Addresses.*"—We have not time to point out books or find addresses.

THE INVISIBLE VENTILATOR supersedes all others to present use; it is simply constructed—easily regulated by a pully applied to a window blind. VENTILATION—PURE AIR.

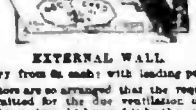
Sherringham's Ventilator, for the admission of pure air through an



EXTERNAL WALL.

With single pulley from 6s. each; with leading pulley, from 8s. 6d.

These Ventilators are so arranged that the requisite quantity of air may be admitted for the due ventilation of an apartment without the slightest draught being felt by the occupants; and as they are placed in the external wall, their action is not impeded when the house is closed for the evening, at which time a constant supply of fresh air is most required.—HAYWARD BROTHERS, sole Manufacturers, 188, Blackfriars-road, and 117, Union-street, Borough; and of all respectable ironmongers, builders, &c.

IMPROVED OAK STAIN.—H. BRETTON, VARNISH MAKER, Hammersmith, begs to call the attention of architects, builders, &c., to his improved OAK STAIN of any shade, now in general demand. It is greatly superior to all other stains, as it can be laid on the naked wood without size or other preparation, and, being an oil stain, will not wear off. Pattern Boards may be seen at the Office of "The Builder," or had at the Manufactory.

A SUBSTITUTE for PAINT.—Cleanliness is necessarily at all times conducive to health, and is, as well as economy, is greatly promoted by substituting for the tedious process of repainting with oil and white lead, STEPHENS'S DYES for STAINING WOOD, as a substitute for paint, for decorating churches, large public rooms, and theatres, as well as private dwellings. Every original invention, when become known and established, attracts a host of imitators, ready to seize upon and profit by another's ingenuity. So in the case of these Stains and Dyes, several imitators have sprung up; but the original inventor has to assure the public that the time he has bestowed upon these articles to render them perfect ensures them against being disappointed in their use. His well-known experience in the preparation of such, enables him to effect the most perfect imitations of the various ornamental woods, while, at the same time, they imbue all the beauty of the natural grain.—The Dyes and Stains are prepared and sold by HENRY STEPHENS, at Hammersmith-road, Blackfriars-road, London, in bottles at 1d. and 1s. each, and 8s. per gallon. The oak, mahogany, and satin-wood colours may be obtained in powder at 2s. per lb., which dissolved in water to form liquid, and 1 lb. will make one gallon of stain.—N.B. The trade supplied.—Sold at the Office of THE BUILDER, 2, York-street, Covent Garden, London; as both of which places may be had the proper varnish and size, with directions for its use.
